

FOR CONTAINER GLASS WARE HANDLING

ADVANTAGES

- Long life
- Provides a non-checking surface

Pyrotek custom fabricates wareguides from WT-2000, P-25T and P-30T materials. These materials are non-checking to glass and offer long product life.

P-25T AND P-30T CARBON/CARBON COMPOSITES

Pyrotek P-25T and P-30T Carbon/Carbon composite materials are made from a unique process whereby carbon is reinforced with carbon fibers. Both materials provide a non-checking surface with a long-life span making them excellent for any hot glass contact application.

Typical uses for P-25T and P-30T include stacker bar inserts, sweep-outs and transfer paddles for the glass container industry. Both materials are also used for a multitude of specialty glass applications.

Note: The physical and chemical properties listed represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice.

Product Type: 512

Commodity Code: 13003, 14005
